GROWERS OF

Fruit and Ornamental Trees

Shrubs, Etc.

Rt. 4, McMinnville, Tenn.,

Feb 22 1917

Gentlemen as to your Request  
I Will try to give you a List  
of our Nursery as Best I can I am  
inclosing a catalogue of our Fruit  
Which I am sure you understand  
Except to New Varieties Which  
I Will Decide as Best I can  
the Wamack choice apple is a  
new apple, in 1861 Mr. Wamack  
Wamack. Brought the apple tree  
from cornland mountain and  
Planted it on his farm in Warren  
Co. Tenn it grew to be a large tree  
and a Great Bearer it Was a rated  
tree for its Great Load of fruit and  
size it Bare most ever year it is  
a large yellow apple Gets Ripe about  
10 Days Earlier than the Early Harvest  
the apple is colored very much like  
the Early Harvest But not quite so  
saw -

So in the year 1902 We started our  
Nursery and we got twigs of this tree  
and grafted them and have been  
grafting them ever year since this  
apple is a leader among early apples  
and deserves the leader ship to  
we gave this apple this name  
Warrack choice. in honor of, Mr  
Warrack because there was a colony  
of Warracks settled at this place  
and it was there choice apple  
as to the growth of the tree it beats them  
all & find the roots of this tree allways  
clean and straight and nice it leads  
in going in the Nursery  
So if there is any thing els you  
want in regard to this apple & will  
give it as best I can

Western White June Peach  
This tree was sent to a man  
in West Tenn. from West Texas  
he planted it on his farm and  
a bout the year 1906 S. D. Elrod  
was at his place and saw the tree  
laded with fine ripe peaches in June  
so he wanted the tree in our  
nursery he had the man to send  
me some buds by mail & budied  
them and have been budying them  
ever year since  
this tree is a thrifty grower and  
a Barndence Barner the body of  
the tree is an orange colored tree  
with greenish colored twigs and a  
pale redd blossom the fruit  
is white a bout the size of the  
Lone Star gets ripe the 1 to the 10 of  
June it aint like ather early peaches  
in its flavor its flavor is like

The old garden Peach most Early  
Peaches has too much Water a Bant  
them this aint the case With this  
Peach it is full of acid and not Water  
this Peach When Ripe can Be Pealed  
Like a Banana But the acid Will Drip  
off one hands most Early Peaches  
aint no Good for Canning Purposes not  
so With this Peach it is a good canner  
and keeps Good & Dont no have long  
We have kept them too years in can  
and still Good

Now Take you may think I am Gasing  
a Good deal to Prove to you I aint if you  
have a Place for 1 or 2 of these trees  
and Want them erect & Cart I Will  
send them to you Free of charge  
We have nothing But Parsons Pond  
Name if I can think of it I Will send  
you some of the Peaches in June
